Monthly Insights: Data After Empty Months (AISanidi-UAT)

*Analysis of every monthly insight row (3,691 items on the 13 synced tables) as of **3 November 2026**: items that have months with data, then one or more months with **No Data = Yes**, and then data again.*

1. Result per platform and level

Platform	Level	Items checked	Items with data after empty months
Meta	Campaign	19	0
Meta	Ad Set	46	0
Meta	Advertisement	153	0
Snapchat	Campaign	193	0
Snapchat	Ad Squad	363	0
Snapchat	Advertisement	848	0
Google Ads	Campaign	77	4
Google Ads	Ad Group	88	2
Google Ads	Advertisement	118	0
Google Ads	Asset Group	28	0
TikTok	Campaign	134	1
TikTok	Ad Group	237	1
TikTok	Advertisement	1,387	0
Total		**3,691**	**8**

2. Campaigns where data resumes after empty months

Platform	Campaign	Platform ID	Last month with data	Empty months (No Data = Yes)	Data resumes
Google Ads	C-2026-001-G-03 (Search)	23070458360	Oct 2025	Nov 2025 – Aug 2026 (10 months)	Sep 2026
Google Ads	حملة العروض الحصرية	20824864711	Feb 2024	Mar – Apr 2024 (2 months)	May 2024
Google Ads	حملة موسم الشتاء 2023	20668279390	Dec 2023	Jan 2024 (1 month)	Feb 2024
Google Ads	Awareness I Search I 110 I Malaka	21823140710	Oct 2024	Nov 2024 (1 month)	Dec 2024
TikTok	fa -Sales	1850581838815362	Feb 2026	Mar – Apr 2026 (2 months)	May 2026

3. Ad groups with the same pattern

Platform	Ad Group	Platform ID	Last month with data	Empty months (No Data = Yes)	Data resumes
Google Ads	Ad group 1	189770930361	Oct 2025	Nov 2025 – Aug 2026 (10 months)	Sep 2026
Google Ads	Ad group 1	155055093496	Dec 2023	Jan 2024 (1 month)	Feb 2024
TikTok	Ad Group5	1867975995286593	Jul 2026	Aug 2026 (1 month)	Sep 2026

Notes

- For every other item, once the first **No Data** month comes, every later month up to the current month is also empty.
- The two Google Ads ad groups match the months of a campaign above (Nov 2025 – Aug 2026, and Jan 2024); they appear to belong to those campaigns.
- These look like campaigns that were paused and restarted: the empty months had no delivery on the platform.
- Every month is fetched from the platform on its own, so a month that gets data later is updated and its **No Data** set back to No.
